Incedo™ Pro Visitor

Setting a new digital standard for convenient visitor management

Modern visitor management for secure, welcoming premises

Managing access digitally to streamline the visitor experience should not be a hassle. Everyone who enters and uses your facility can experience a professional welcome, moving into and around buildings conveniently and securely.

Incedo Pro Visitor handles the process from the very first step. This intuitive platform – an optional module within the Incedo Pro access management solution ecosystem – simplifies the process of inviting, verifying, and admitting every guest. It can integrate with your existing access control system and is available as both a cloud-based and an on-premise deployment.

With Incedo Pro Visitor, you move seamlessly and securely through each step, from invitation to admission, making every visitor feel at home and ensuring your visitor access protocols are user-friendly, compliant, and efficient.

How your organization benefits with Incedo Pro Visitor

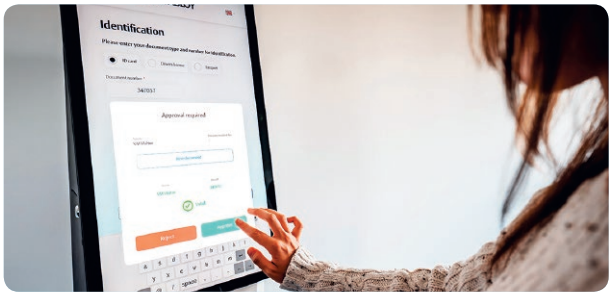

Fewer delays

- hosts and organizers save time and effort
- real-time scheduling and clear status updates

More control, less effort

- manage all visits from a single dashboard
- stay in touch, or act fast with notifications

A great first impression

- present a tech-forward image for your business
- choose self-service check-in and/or digital kiosks

Flexible, scalable, time-efficient

- automate registration to cut security team workload
- suited to any sector, security level, or visitor profile

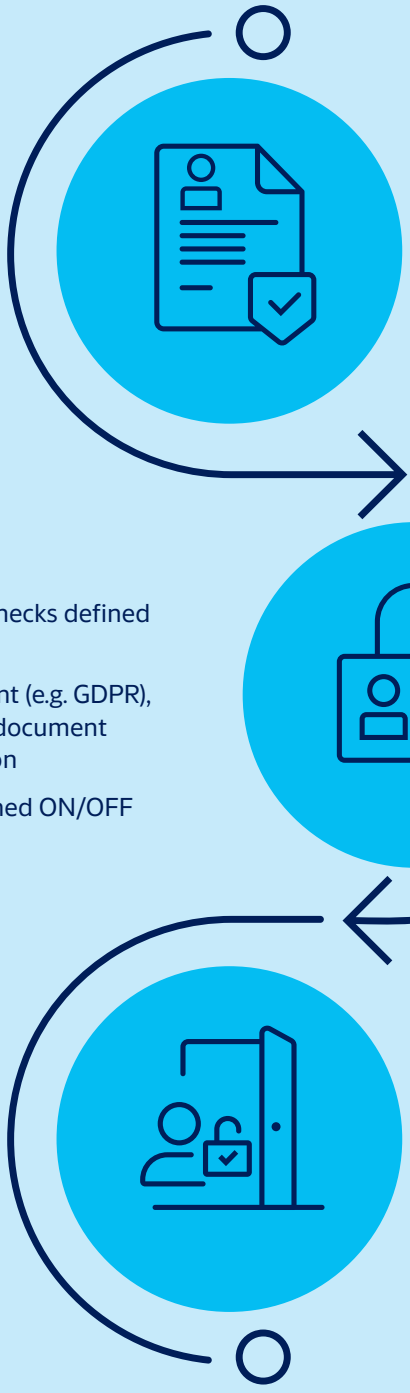

Trusted, compliant security

- GDPR-aligned consent, data, and documentation handling
- increased transparency with optional identity verification

The Incedo Pro Visitor process

Streamlined, secure access – from invitation to entry

Part of a suite of connected digital access solutions from ASSA ABLOY, Incedo Pro Visitor manages every step of the visitor management process clearly and efficiently.

Invite

- organizer or host schedules visit and sends email invitation
- visitor can pre-register and enter details online ahead of arrival

Verify

- visitors must complete checks defined exclusively by you
- may include policy consent (e.g. GDPR), site rules, safety video, document submission, ID verification
- every step may be switched ON/OFF to match your policies

Admit

- simplest path: visitor presents QR code or enters via PIN
- on-site completion: check-in finalized by staff tablet
- physical card: optional kiosk to issue credential
- host receives entry notification and visitor status is monitored in real time

Platform components

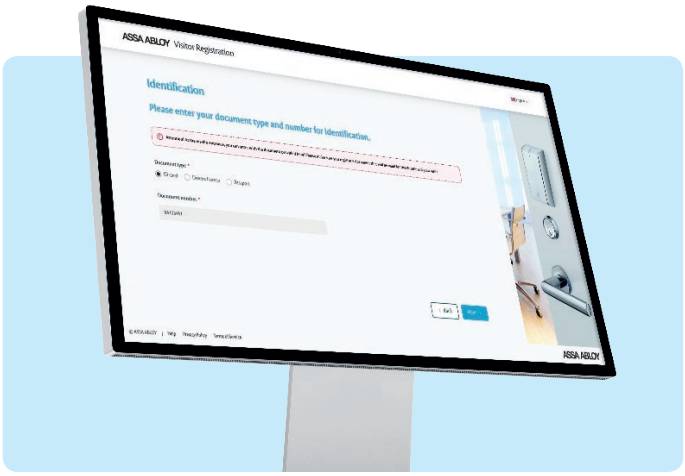

Incedo Pro Visitor runs as a cloud-native platform on Microsoft Azure for rapid deployment, easy regular updating, and secure data handling. It can offer remote access management from anywhere.

Integration with the Incedo Pro platform ensures access rights and credentials may be assigned, amended, or revoked anytime. Visitor access is by optional QR, access card, PIN, or ID reader.

To match your needs and budget with the right implementation of Incedo Pro Visitor, you also have a flexible choice of licences – based on the number of on-site hosts, guards, kiosks, and tablets.

Employee module
Intuitive admin dashboard for visitor management, reporting, notifications, and oversight (includes multilingual support).

Visitor module
Pre-register online and complete any required visitor checks or tasks (e.g. watch a site safety video).

Kiosk
For self-service access and/or on-premise physical card issuing.

Tablet
For security staff or self-service access without a physical card.

Security and compliance benefits

Deploying Incedo Pro Visitor helps you stay on the right side of compliance – in multiple ways

Data protection
capture visitor consent and documentation in line with GDPR (policies configurable by site)

Controls and audits
role-based access (RBAC), event logging, transparent visit status accessible by hosts/organizers

Secure data handling
Azure-hosted with encrypted data, both in transit and while stationary (full documentation available)

Mode	Includes	Ideal for
Easy entry	Visitor pre-registration without identity verification	Conferences, exhibitions, low-security areas
Controlled	Registration, data consent, safety video, rule acceptance	Offices, businesses, public spaces, industrial facilities
High-security	Controlled mode, identity verification	Government, military, critical infrastructure

What else sets Incedo Pro Visitor apart?

- Integrates with Licence Plate Recognition (LPR) to manage visitor and vehicle registration together
- Group access may be administered by a single visitor, simplifying coordination of multi-person visits
- Flexible visit lengths and locations are handled via access system, streamlining contractor management

Where Incedo Pro Visitor can create a seamless guest experience

Simpler secure visitor management, whatever your sector

Corporate
offices, HQs, co-working spaces, and more

Industrial
manufacturing premises, factories, warehouses

Government
public buildings, town halls, medical centres

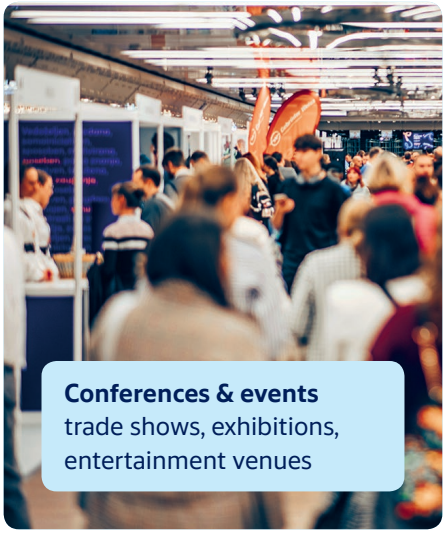

Implementing time-saving digital visitor management is easier than you think, in all these locations and more.

Education
schools, colleges, universities, daycare centres

Critical infrastructure
utilities, data storage sites, water treatment plants

Conferences & events
trade shows, exhibitions, entertainment venues
